

Communication Solution – Wonderware® InTouch® and Pro-face GP

Now available from Pro-face is an I/O Server to communicate between InTouch and Pro-face Operator Interfaces.

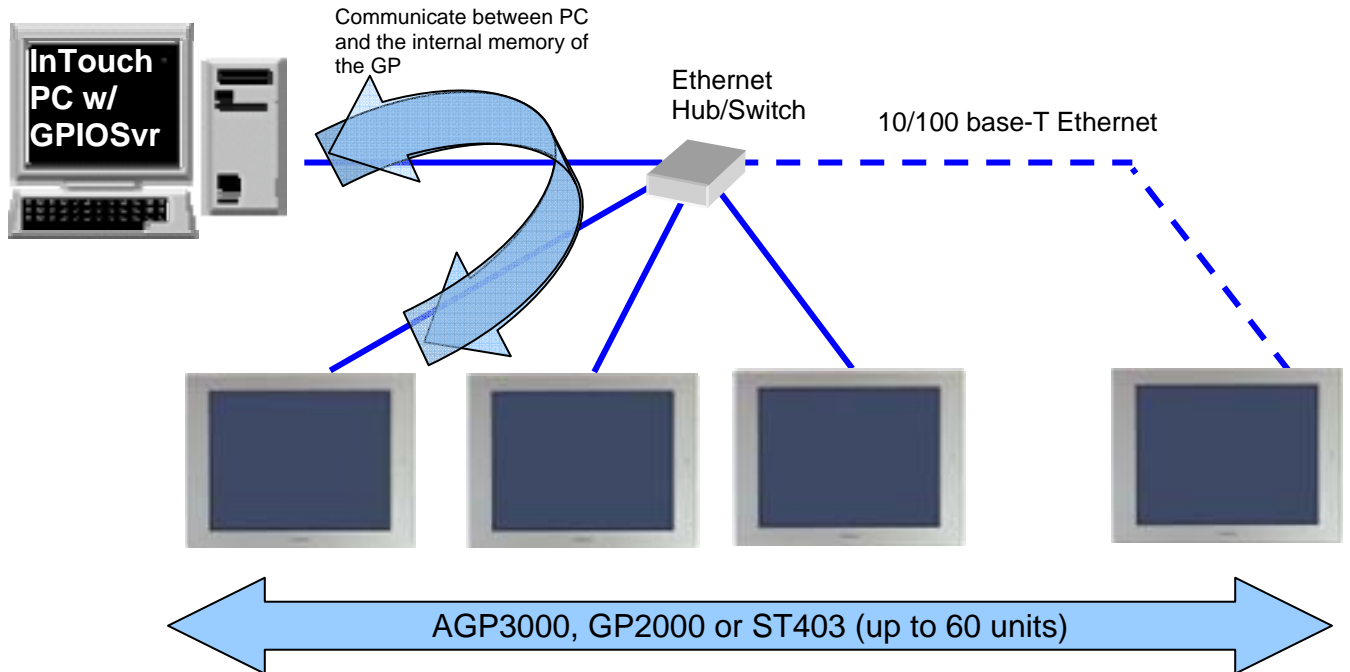

Data collection is the key to understanding your process. Wonderware InTouch can be an essential tool, allowing you to see the data from your manufacturing or process environment. Sometimes running InTouch on an Industrial PC is overkill. Now there is a solution! Connect the Pro-face GP2000, AGP3000 or even the ST403 when you need a remote display then using Ethernet, send data to your InTouch PC.

Features/benefits of this I/O server (GPIOsvr.exe):

- **Connect** up to 60 Pro-face GPs, AGPs or ST's to one InTouch PC
- **Save money** by distributing dedicated Operator Interface units where they are needed, eliminating the need for many (potentially costly) InTouch enabled Industrial PCs
- **Increase reliability** by using dedicated Operator Interfaces. The Pro-face Operator Interface units do not have fans or any rotating media.
- **Easy** to configure, only one menu for the general configuration and one for each Topic Name (see figure at right)
- **Network** serial devices; by using the Pro-face Operator Interface to communicate to your serial device, then using the Ethernet port on the Pro-face to transfer data to InTouch
- **Save Space** by using the Pro-face ST403, the 3.8" Ethernet enabled touch screen display
- **Display large amounts of data** by using the Pro-face AGP3750, the 15" Ethernet enabled touch screen display. This I/O Server also supports Pro-face 5.7", 7.4", 10.4", and 12.1" displays.

PRODUCT SPECIFICATIONS

Functionality	This program acts as an "IO Server" for Wonderware's InTouch, and allows communication to the Pro-face brand GP Operator interfaces via Ethernet and UDP/IP
Supported communications	DDE and SuiteLink
Supported version	InTouch 7.11 or later
No. of supported GP	Up to 60 GPs
Memory types supported	WORD, SHORT, DWORD, INT, message, BIT, STATUS LS0 to LS8191
PC supported	The PC must be sufficient to run InTouch
Pro-face unit support	GP2000, ST403, AGP3000, Factory Gateway

Wonderware and InTouch are products of, and are registered TradeMarks of Invensys
